Reasons For Allowance

Claims 1-8, 10-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record single or in combination failed to teach the combination of the invention as claimed in independent claim 1.

For example the prior art of record failed to teach the second communication session transfers the preferred data and a display control parameter to the display device and transfers an indication of one or more operational condition of the display device to the host server, placing the remotely located display device in a presentation mode configured to present the preferred data in response to the display control parameter.

Specially, the limitation initiating a communication session with the host server from the display device in order to receive new preferred data from the host server and to report adverse conditions to the host server that are detected by the display device during a health status check of the display device. The features mentioned above are clearly support by the specification (pages 18-21). The above features in light of other features of the independent claim 1 enable claim's allowable.

The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitation set forth.

Art Unit: 2152

Claims 17-20 are means plus functions claims. The limitations of claims 17-20 are clearly support by the specification (pages 18-21) and Figure.1 of the drawing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
